

Playdog

Complete dog food

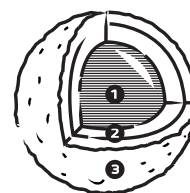

EXTREME PLUS

COMPLETE FOOD FOR PARTICULARLY ACTIVE SPORTING ADULT DOGS OF ALL BREEDS ENGAGED IN CONSTANT PHYSICAL ACTIVITY

PLAY DOG EXTREME PLUS is a complete food formulated specifically to meet the nutritional requirements of **particularly active sporting dogs engaged in constant physical activity** (hunting dogs and dogs undergoing intense physical training even in particularly harsh climatic conditions). It is also recommended for **working dogs and sled dogs**. It provides sufficient protein and fats with no need for large, bulky meals.

Contains Omega 3 and Omega 6 fatty acids for healthy skin and coat and Choline Chloride to promote absorption of fats and prevent excess fat deposits in the liver. **Our exclusive triple-layer kibble** is made with different cooking times for different materials for easily digestible starches.

Moreover, **animal proteins, minerals and vitamins are blended cold to preserve all their nutritional and organoleptic qualities**, without submitting ingredients to an additional heat treatment.
